

Dominator semi-inclined towed harrows, foldable in three pieces

The semimounted towed harrow can be folded in three pieces and is equipped with a front furrow cracker, hydraulic tipping rear wheels and vibrating springs.

This is the ideal system for preparing the ground for sowing: the spring enters the ground and breaks up of clods of soil.

Three versions are available: Dominator 500, Dominator 600, and Dominator 700.
