

Forestry loader for tractors, trailers, and power hoes - with 3 point bolted attachment

The Versus forestry loader was designed to load and transport trunks. It is particularly suited for assembly on forest tractor-trailers and can rotate 360°: these features position this product as one of the best forestry loaders available.

Easy handling and durability are two of the main characteristics of this line, guaranteeing the operator safe and reliable performance.

Forestry loader *VERSUS* applied on power hoes

Assembly on power hoes:

- CARON

TECHNICAL DATA

	TFC3000 VERSUS	TFC3500 VERSUS	TFC4200 VERSUS	TFC5100 VERSUS
Arm length - to grab center (mm)	3000	3500	4200	5100
Weight kg	450	480	640	840
Max weight / Max Load	300	250	400	500
MAX height (mm)	4500	5000	5500	6500
Minimum required tractor	35-40 HP	35-40 HP	55-60 HP	80-90 HP
Central rotation	360°	360°	360°	360°
Unlimited grab rotation	360° rotatore T1	360° rotatore T1	360° rotatore T1	360° rotatore T3
Arms	2	2	2	2
Sliding hydraulic arms	-	1	1	1
Sliding hydraulic arm length (mm)	-	500	1000	1200
Grab Type	THL 30	THL 30	THLS 30	THLS 30
Three-point bolted attachment - Operating pressure: 180 bar at 540 rpm				

ACCESSORIES

	TFC3000 VERSUS	TFC3500 VERSUS	TFC4200 VERSUS	TFC5100 VERSUS
Excavation Kit	O	O	O	O
