

Motorized sidewalk salt-spreader mod. SPEEDY SNOW

Tecnomeccanica offers a vast assortment of machinery for wintertime road management, snow removal equipment.

We produce motorised salt spreaders to meet all needs: salt spreaders for pavements and small public spaces, self-loading broadcast salt spreaders, salt spreaders for operating machines (for sector professionals).

We also offer a vast range of snowploughs for pavements and pedestrian walkways, snowploughs for public spaces, and equipment capable of both removing snow and spreading salt on pavements.

indietro

Regolatore di flusso avanzamento avanti

SpargSalt spreader with patented helical roller and independent HONDA motor for spreading salt and driving wheel.

The hydraulic salt distribution on this machine is regulated by a hydraulic flow regulator for optimal dosage of the product.

The commands (**FORWARD - REVERSE**) on the hydraulic system feature 2 flow regulators that allow the operator to regulate the maximum operating speed as desired.

TECHNICAL FEATURES

	SPEEDY SNOW
Length mm	1980
Width mm	1050
Height mm	1100
Capacity kg	200
Maximum speed	4.5 km/h
Operating width cm	70
Honda motor	5.5 HP
