

Forestry trailer homologated and equipped for loader and drive 5000 kg

This **trailer** offers everything necessary for **forestry work**, according to your needs: the crane (from the Baby to the TFC3500 VERSUS model) is equipped with a hydraulic rotating grab that allows transportation of logs while the trailer allows for the transportation of timber even on relatively steep slopes.

Moreover, the trailer is also suitable for transporting cereals as well as many other uses.

This trailer can be homologated for 4000 kg while maintaining the same specifications.

TECHNICAL DATA

	FT50V
Body dimension (m)	1,60 x 2,80
Sides height (cm)	50
Trailer weight (kg)	1150
Tailgate opening	standard
Can be tipped in 3 directions	standard
Holes for posts	N. 8 2 front, 2 rear and 4 lateral
Locking brake lever	standard
Tyres	10.0/75-15.3 18 PR Forestral use
Rear capstans	2
Capstan per side	1
Feet with small wheel	standard
Drive axle with forestal tyres for traction	standard

Optional

- Drop-down sides
- Side protection cm 50
- Zinc-plated sides for each set of 4 sides
- Hydraulic feet
- Hydraulic brake (not homologated)
- Reduction gear complete with cardan joints
- Bevelled double sheet metal base with anti-slip corner pieces for logs

Note: This trailer can be homologated only with the product listed below

- Mod. TFC3500 VERSUS

Both COMPASS and VERTICAL feet are available

TECHNICAL DATA - TFC3500 VERSUS

	TFC3500 VERSUS
Arm length - to grab center (mm)	3500
Weight (Kg)	480
Max weight / Max Load (kg)	250
Max Height (mm)	5000
Minimum tractor power	35-40 HP
Central rotation	360°
Unlimited grab rotation	360° rotator T1
Arms	2
Sliding hydraulic arms	1
Sliding hydraulic arm length (mm)	500
Grab Type	THL 30

Optional

- Excavation Kit
- Independent hydraulic system
- Supplemental G3 step-up gear unit with power drive through shaft
- Seat
- Power hoe mounting kit
- 3-point connector for tractor
- Double stabilizer feet
